15 Assistance in changing ownership - submission of documents, conclusion of the necessary contracts and other necessary administrative activities 20,04 €

Description: The indicated price is for assistance in changing the ownership for one site. In order to perform the service, it is necessary for the customer to authorize EPRES in advance with the rights to perform the necessary activities (to be represented in the relations with the grid operators).

### 16 Participation in a standard balancing group

#### according to an individual offer

Description: Concluding a contract for participation in a standard balancing group which transfers the responsibility for balancing of the respective sites to ENERGO-PRO Energy services EAD in his capacity of a coordinator. The results from the forecast and reported amounts of the consumption of these sites become part of the settlement of the group. The sevice is suitable for big industrial customers with hourly measurement irrespective whether their contracts for supply of electricity are concluded with ENERGO-PRO Energy services EAD or another supplier.

\* If the installation of a site does not allow the consumption measurement to be covered by only one device, then the monthly fee for the respective site is increased by the indicated amount for each additional metering device

Description: The service represents a subscription-based access to a web-based platform with real-time electricity consumption data on sites after the installation of specialized equipment. The service can be used by all users regardless of the voltage level of the grid to which sites are connected, as well as the needs of usage - household or commercial. A client may use the service for more than one site by paying the full monthly fee for each one of them. In case a site requires the installation of more than one device, each additional device increases the monthly fee for the representive site by the corresponding amount on subscriptions.

The service is aplicable for sites on the territory of the regions of Varna, Ruse, Dobrich, Shumen, Targovishte, Razgrad, Veliko Tarnova, Silistra and Gabrovo.

#### 18 Energy efficiency audit

#### according to an individual offer

Description: Energy efficiency audit of buildings, enterprises, industrial systems and outdoor artificial lighting systems. Issuing energy performance certificates for buildings. Assessment of achieved energy savings.

according to the terms of the grid operator

Description: Covering costs incurred in connection with disconnected and reconnected electricity supply to customers who have changed their supplier, but have not paid their due amounts within the specified deadlines or are in default of other contractual relationships with their previous supplier. If a power supply disconnection occurs, the reconnection is made after payment of the service price as well as the amounts due by the customer for the respective site and the statutory interest for late powernet.

<sup>\*</sup> The services are requested for performance to the respective grid operator within 2 working hours after receipt of the amount on the account and/or elimination of the non-performance, which led to disconnection of the supply,
